About Me

A skilled professional with a passion for both data science and web and webapp development. Possessing a solid foundation in data science methodologies, statistical analysis, and machine learning algorithms. A good experience in data manipulation, visualization, and extracting actionable insights from complex datasets.

Education:

Bachlors in **Data Science**

Institute:

Pak Austria Fachhochschule, Institute of Applied Science and Technology

Project Management

Skilled in managing project scope, and resources effectively, while ensuring high quality and user satisfaction. Strong abilities coupled with excellent problem-solving skills, enabling successful collaboration with cross-functional teams to achieve project objectives.

Experience

NCP Internee | 2022

During my internship at the National Center of Physics (NCP), I engaged in hands-on practice in data analytics and data collection techniques. This experience provided me with a practical understanding of data processing methodologies and their applications in scientific research.

PTCL Internee | 2023

During my six-week internship at PTCL's Business Intelligence Department,I actively engaged in utilizing various tools and technologies, including SQL, PowerBI, and Microsoft Office suite. Through hands-on experience, I honed my skills in data analysis, visualization, and reporting, contributing to the department's projects.

Programing

- HTML
